

**REMARKS/ARGUMENTS**

**The Amendment**

**In the Specification**

Paragraph [0001] entitled “Cross Reference to Related Applications” has been amended to include reference to the parent application, to recite that the provisional application is now abandoned, and to recite that the disclosure of the parent and associated sequence listings are incorporated by reference.

Paragraph [0058] has been amended to include the full citation of the Pierson III and Thomashow, 1992, journal publication. A copy of the publication is enclosed herewith. A comparison of the information in paragraph [0058] and the publication shows that this is the correct journal citation. This journal publication is also discussed by applicants in [0217].

**Sequence Listing**

Applicants hereby request that the computer readable form (CRF) copy of the sequence listing filed September 27, 2001 be transferred from the parent application, Serial No. 09/965,175, to the instant application, and that the Patent and Trademark Office make the necessary change in application number and filing date to conform with the instant application. Included herewith as attachments are: “Request for Transfer of the Previously Filed Sequence Information,” copy of “Statement of Sequence Correspondence” filed September 27, 2001 in the parent application, and paper copy of the Sequence Listing filed September 27, 2001 in the parent application.

**In the Claims**

Claims 1-7 and 10 have been canceled.

Claim 8 has been re-written in independent form. Support for this amendment can be found in original claim 1.

PATENT

**Conclusion**

The foregoing amendments and remarks are being made to place the application in condition for allowance. These amendments do not introduce new matter.

Applicants respectfully request consideration and the timely allowance of the pending claims. A favorable action is awaited. Should the Examiner find that an interview would be helpful to further prosecution of this application, he is invited to telephone the undersigned at her convenience.

Respectfully Submitted,

Margaret A. Connor
